Art Unit: 1775

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-39, drawn to a electroless brass plating method, classified in class 427, subclass 304.
 - II. Claims 40-61, drawn to a plated brass layer, classified in class 428, subclass 615.
 - III. Claims 62-78, drawn to a brass on a substrate, classified in class 428, subclass 209.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II, III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a different process such as by buffing the metallic surface with a sand paper then dip coating or spray coating the metallic surface with a molten brass. The process as claimed can be used to make a different product such as a construction material.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. An attempt telephone call was made to Atty: Jay Yablon on August 08, 2005 to request an oral election to the above restriction requirement, but did not result in an

election being made. Applicant is suggested to provide a telephone number on the correspondence.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
